Diann's Happy Tails

Obedience Training Newsletter

Dante has spent this week teaching a new friend some very good dog social skills. The amazement of watching him communicate with other dogs is so rewarding. More owners should learn to pay attention to what their dogs are trying to tell them through their body language. Watch a group of dogs interact and understand how and why they do what they do. Ozzie will be so much better off now with other dogs by learning some doggie rules. Dante is very proud. His job is done, at least for now. 2 boys take a needed break after a fun play session.
