check out the wellness dog food site to learn more about this food,**

A question I get often is it ok to mix. YES. There are many reasons you might want to mix your dogs food. One: allergies. An exp. is my dog Dante. he must have grain Free food, but many G/F is high in calories. So, by mixing the G/F with a lower calorie food is perfect for him. Also, by mixing the different meat proteins every few months, helps keep down the tolerance to protein allergies that can happen if a dog eats the same meat source all the time.
