NEVER PAY FULL PRICE FOR DOG DAYCARE AGAIN WITH THE NEW PUNCH CARD:

New change to play class punch cards.

**PLAY CLASS CARDS:
CHANGE BEGINS MAY 1ST.**

As of May 1st, you can use your play class cards time by time. Instead of paying for four at once to get the 5th free, you can now pay for one class at a time, and still get the 5th one FREE.

Anyone may sign up for a play class card or a dog daycare card. Just ask. As of Thurs. May 17th, play class will be in the evenings.

I would love your feedback on the day, time, suggestions and ideas.

pre sign up and pre pay is still required, as well as confirmation. If you sign up and have a play class card, one punch will be used if you fail to give 48 hrs notice for cancelation.

As of may 1st, Diann will be using new punch cards for your dog's daycare. The normal price is \$25.00 per day. With the new punch cards, each time you bring your dog for a day care day, you will get \$5.00 off. Each day care day will be \$20.00.

On the last punch, which is #5, daycare is 1/2 off. Your price will be \$10.00.

All dogs need to pre register. Times are subject to be different on some days, so it is important to contact Diann about setting the time schedule for the day or days you want.

Day care days will be from Mon to Fri, exceptions may apply for weekend daycare. No expiration date for daycare punch cards.

11 lbs. sale at \$28.
salmon***tuna or chicken**

[to be ordered]

Canned merrick cat foods are all 1/2 off regular price. IN STOCK

The biggest question I get regarding pet food is price. Grain free is more expensive, so many owners choose to go with the regular. What is the difference? Not every food is perfect for every dog. The biggest difference in Grain Free over the regular is what is used for fillers. Many of the regular pet foods use fillers such as rice: oats: oatmeal: Corn meal: and other ingredients that many dogs can't or shouldn't be eating. The Grain free foods will use sweet potatoes, peas, and more healthy high protein fillers that are healthier for your pet. Grain Free means your pet will get filled up quicker, have more energy sense it's grain free and has more protein. Many of the other ingredients will run right through your dog almost as fast as it went in. That means it is not in your dog's system to be of any use. There will be more waste to pick up, you will end up buying more food. Grain free should have more meat sources in the first 5 ingredients. The most important thing to look for, no matter which food you use, is to **READ THE LABEL. No Corn meal, by products, you want natural preservatives, vitamins, etc...**

You want real meat or meat meal, followed by healthy fillers. Go to websites when looking at a food, there are thousands out there. Go to chat rooms where other owners talk about their pets food and likes and dislikes, it can take up to 3 months for a change to be seen in your dog. May be less or more- but don't expect miracles the first week. Don't be fooled by pretty labels and lots of advertising. You pay for bad food when a comp. spends allot on advertising. **READ & RE READ LABELS & ASK QUESTIONS. The best pet foods are usually not found in the grocery store and are family run with no outsourcing. You want to know where all the products in that food come from.**

You can add years to your pets life by good nutrition not to mention the vet bills you will save with a healthy pet. Many healthy pet foods are not grain free. Some Grain free are to

rich for some pets, use your good judgment, learn as much as you can and don't hesitate to ask questions.
